D'link dir-605l default password

If your DIR-605L rev A1 router is not working as it should, dropping connections or not being responsive, you should first do a reset of the router to see if the problems persist. Other scenarios where you might want to reset your router is if you've forgotten the password or misconfigured it and can't get access anymore. You can reset your D-Link DIR-605L rev A1 in the following way(s): With the reset button Locate the reset button on the back off the routerWhile the unit is powered on, press the reset button with a sharp object (e.g. paperclip)Hold the button pressed for 10 seconds, then release.The unit will reboot by itself and once the WLAN light stops blinking the factory reset is done.You can now setup your router again through the user interface The 30-30-30 reset If the above instructions don't work you can always try the 30-30-30 reset as follows: When router is powered on, press the reset button and hold for 30 seconds. (Use a paper clip or something sharp) While holding the reset button pressed, unplug the power of the router and hold the reset button for 30 seconds While still holding the reset button down, turn on the power to the unit again and hold for another 30 seconds. This process usually works for resetting any router to it's factory setting. If that doesn't work be sure to check out the questions and answers incase someone else has had similar problems resetting their router. Note: It is worth reading more about how to reset routers with the 30 30 30 reset and what the risks and considerations are when resetting your router this way, instead of just rebooting it. To get access to your Dlink DIR-605L, you need the IP of your device, the username and password. You'll find such information in the Manual of your Dlink DIR-605L router. But if you do not have the manual for your router or you do not want to read the whole manual to find the default login information then you can use the quick guide below. To get to the router login page it's necessary that you are connected to the router. Dlink DIR-605L Login Guide Open your web browser (e.g. Chrome, Firefox, Opera or any other browser) Type 192.168.0.1 (the default IP to access the admin interface) in the address bar of your internet browser to access the router's web-based user interface. You should see 2 text fields where you can enter a username and a password. The default username for your Dlink DIR-605L is admin.The default password is admin. Enter the username & password, hit "Enter" and now you should see the control panel of your router. If above login credentials doesn't work with your Dlink DIR-605L router then try this method Try different ID/password combinations that are widely used by Dlink that you'll find below. In this list are the most popular default username and password combinations used by Dlink. Sometimes the username and password doesn't work that we mentioned in the top of this guide. Then you can try these username/password combinations below to get access to your Dlink DIR-605L wireless router. # Username Password 1admin(blank)2adminadmin3(blank)(blank)4(blank)admin5adminpassword6admin12347create in initial setupcreate in initial setup8(blank)created in initial setup9adminroot10useruser11Adminleave blank12adminrefer to router label13admintelus14root(blank)15ipbxbipbxb16adminSame as network key or WIFI key. Can be found on a Default login IPs for my Dlink router You tried different router IPs but nothing worked? Did you try the following IPs? In the list below we listed all known router IPs for the manufacturer Dlink. Maybe this will work for you. # Default Router IP 1192.168.0.12192.168.1.13192.168.0.504192.168.0.995192.168.0.206192.168.0.307192.168.0.108192.168.0.329192.168.15.11010.90.90.9011192.168.0.3512192.168.0.401310.0.0.114192.168.0.10115192.168.98.1701610.0.0.21710.1.1.11810.1.1.1319192.168.229.6120192.168.100.121unknown22192.168.254.25423192.168.1.25424192.168.11.1.1 Manuals for Dlink DIR-605L Manual 192.168.0.1 192.168.0.50 192.168.1.1 192.168.0.20 192.168.0.30 10.1.1.1 192.168.10.1 192.168.0.40 10.90.90.90 192.168.229.61 Username Password admin none admin admin none none admin (blank) admin blank admin (none) admin password (none) admin none admin (n/a) none Portions © Wikidevi under CC BY-SA 3.0. Here you can find the default IP address and the predefined access data for the user interface of the DIR-605L N300 Cloud router of D-Link. In the bottom part of this website, you will find a manual for accessing the user interface of this router and resetting its factory settings. No wireless networks are preconfigured for this device. Accessing the user interface is necessary when you want to change the router configuration. For the D-Link DIR-605L, you have to do the following steps for access: Put router into operation Connect the device via Wi-Fi* or a network cable with the router Start web browser Paste IP address or URL in the address bar and then confirm with 'Enter' key Enter username in the open user interface and confirm again * Make sure that your router's Wi-Fi is activated. Resetting default settings is especially helpful when you have changed and forgotten the login data for the user interface. Please consider that not only will settings like IP address, username and password be set to factory settings, but all configurations you may have made will as well. Execute hardware reset To reset the D-Link DIR-605L to its default settings, you have to do the following steps: Turn on router Press RESET button for at least 10 seconds Device is automatically restarted Restoration of standard settings is finished Execute software reset With the D-Link DIR-605L, you can restore the factory settings with the installed software. Log in to the user interface of the router with your access data and execute the steps that are described in the user handbook. After you have successfully executed the steps mentioned above, the configuration of the router will be reset to factory settings. If you want to log in to the user interface, you have to use the preset login data. Method 1 Step 1: Open your web browser and enter or or into the address bar. The default username is Admin and the password is blank (nothing). Click Login. Step 2: Click on the Setup tab at the top and click Wireless Settings on the left side Step 3: Click on Manual Wireless Network Setup Step 4: Scroll down the page to "Wireless Security Mode". This is the section where you specify the wireless password. You can specify a new password; be sure to click Save Settings at the top of the page once complete. If you've registered your router with mydlink, you may log in to the mydlink web portal at eu.mydlink.com to modify the settings. Method 2 Step 1: Go to Step 2: Log in to mydlink with your existing mydlink account and password. Step 3: Choose the router from My Devices. Go to Settings. Step 4: Go to Basic Settings to modify your password. You may also click Show password in order to display the password on your screen. Step 5: Select Apply if you have made changes to Settings. Step 6: Select Yes if you would like to apply the new settings to the router. It will take at least 80 seconds to save the changes and reboot the router.
